

# Pre-hospital and Aero-medical Retrieval Medicine Course

Date: 6<sup>th</sup> April, 2013

This excellent training course is intended to train our Macau local doctors, nurses and paramedics involved in the emergency transport of patients by aircraft and helicopters. This also teaches medical professionals how to deal with disaster event before it occurs, providing up-to-date knowledge and appropriate skills to accomplish from ground to aeromedical retrieval in domestic situations. Certificates will be rewarded to those who have high level of understanding and proper skills to be demonstrated by simulation based assessments.
