

Practical Endoscopy Training Course – Part 3 (Narrow Band Imaging)

Objectives: To enhance the quality and safety of upper and lower gastrointestinal endoscopy training in the region, the Faculty of Health Sciences, Macau University of Science and Technology and University Hospital, MUST established the training initiative.

The faculty established a comprehensive series of theoretical, hands-on simulation and standardized endoscopy training courses, conducted by high quality trained supervisors both from Hong Kong and Macau. Standards have been set for individual physicians and for the conduct of quality training in endoscopy. Targeted at physician and surgeon trainees, the faculty provides local support for the endoscopy workforce to ensure they have the skills, resources and motivation necessary to deliver high quality patient care here in Macau.
