Collection of COVID-19 Vaccination Information

All students,

In cooperation with the epidemic preventive measures of Macao SAR Government and University, as well as to achieve herd immunity and protect students' health comprehensively, we are going to collect the information about COVID-19 Vaccination from all students again. All students should truthfully fill out the questionnaire in WeMust Student App before September 30, in order that the University could opportunely formulate the contingency measures to prevent the epidemic based on the latest information. If students don't make declaration before deadline, the services and facilities on campus will be suspended. In cooperation with environmental risk management and epidemic preventive measures on campus, students should truthfully complete the declaration, otherwise their campus activities will be temporarily compromised.

The Macao SAR Government has provided free COVID-19 vaccinations for all students (including local students /non-resident students) with authorization to stay in Macao. For details, please refer to our website: *Anti-epidemic Useful Information Station* (<https://www.must.edu.mo/student-affairs-office/epidemic-prevention/page5>).
