

Project Management Training Roadmap

- Project Management Training consists of two distinguished series, namely *Business Professionals Series* and *Business Leadership Series*.
- The *Business Professionals Series* covers the essentials of Project Management, i.e. Project Management 101, Project Planning & Control. This series lays the foundation for business managers to acquire the core Project Management knowledge and skills through two specialized business training programs. This is not just another average textbook question and answer training program, but a customized, recognized training program. The two programs will provide business managers the ability to plan and manage a project in a professional manner.
- This series is designed for the business manager who is playing a project manager or a stakeholder role in a project. Upon completion of these two programs, the participant will receive The Executive Certificate Award from Macau University of Science and Technology.
- The *Business Leaders Series* covers the advanced components in Project Management, i.e. Vendor Management, Risk Management, Project Management Office, and Managing without Authority. A business manager that has already mastered the basics of Project Management can use this series to step up their game. These four training programs equip the business manager with exceptional breakthrough project management skills techniques to tackle problems and challenges at work.
- This series is designed for the business manager who is playing a leadership role in a project. Upon completion of these four programs, the participant will receive The Executive Diploma Award from Macau University of Science and Technology.
