

Department:	School of Business
Course Name	Financial Statement Analysis
Hours per week	3
Number of Credits	3
Course Description	<p>This course provides a systematic framework for using financial statements in business analyses. It considers a comprehensive set of tools to analyze the information contained in financial statements and demonstrates how to use the information to evaluate financial performance. It addresses questions such as: (1) how do operating and financial decisions contribute to a firm's return, (2) why does firm performance differ between competitors, (3) has the firm distorted the accounting numbers and how will this influence reported performance,</p>
